### INSTALLATION OF AIR CONDITIONERS IN CLASSROOMS

“Your philosophy creates your attitude, which creates your actions, which creates your results, which create your life.”  
- Jeff Olson

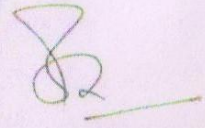

Dear Parent,

A warm welcome to the new academic session at Shiv Vani.

The month of April heralds the approach of another blazing summer. The sweltering heat of the long summer months makes teaching and learning very challenging. Temperature affects engagement level and attention span and overall productivity of individuals of all ages. There is a strong research today that suggests that there is a direct correlation between school infrastructure and educational performance of students. Keeping the students' comfort in mind and to enhance their learning by providing better environment, **the school management has decided to install air conditioners in all classrooms in a phased manner in about 2 years time.** You will be glad to know that the first phase has already started with the installation of air conditioners in Pre-School and Pre-Primary classes. All the classrooms in Junior School will be air conditioned at the completion of the first phase. Installing air conditioners in classrooms is undoubtedly an expensive undertaking but we are hopeful that the benefits of enhanced learning environment will far surpass the fiscal costs. **This improvement to the school infrastructure comes at no extra cost to the parents.**

We thank you for your continued cooperation and support.

Regards,

  
Principal
